# New Updates to ArborMetrix Reporting Application

New Content

In-Process Metrics Report

A new In-Process Metrics Report has been added to the application, with two new measures: Binary PIP <25 and Continuous Proportion of ECPR.

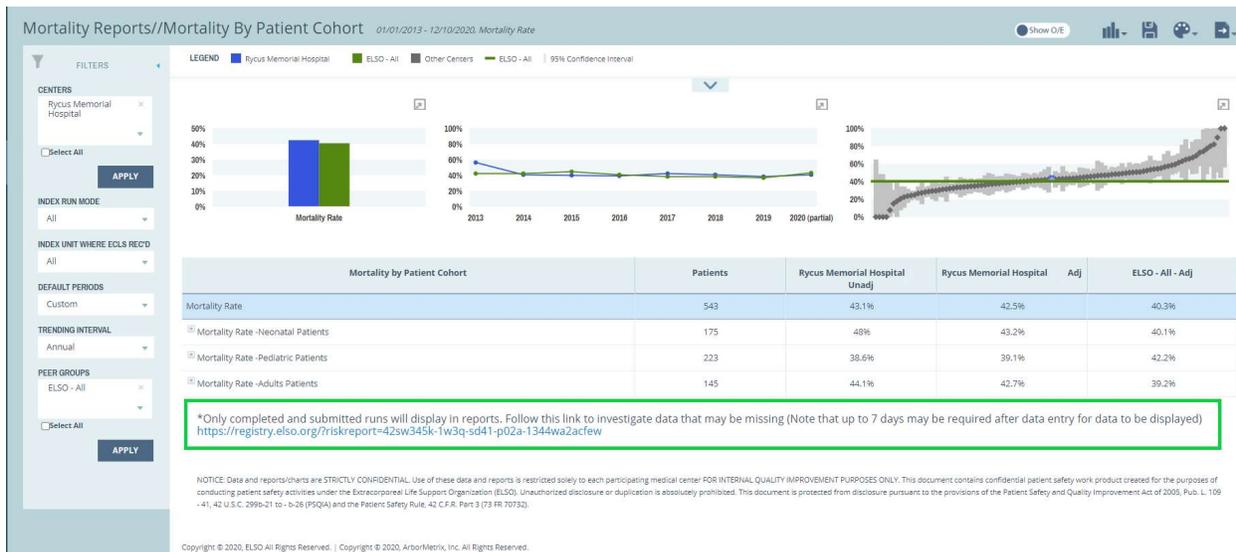

Unit Where ECLS Received Filter

A Unit Where ECLS Received filter has been added to all reports.

New Updates to ArborMetrix Reporting Application

Data Validation Report

A link has been added to all reports where users can investigate missing data. When incomplete data is submitted, it is excluded from Risk Adjusted measures. Click the link to see which data has been excluded and why.

Guide for New Users

We've added a Guide for New Users under the Resources tab, where users can learn more about graph interpretation, confidence intervals, and risk adjustment.
